

Cisco Headsets

Extending the secure and reliable collaboration experience.

The way we work has evolved, and we're no longer confined to an office environment.

From home, the office, or anywhere in between, we continue to rely on technology to get work done – making staying connected, wherever we work, more important than ever.

Whether working from home, a coffee shop, or in the office, each of us must remain intently focused on our work. Accomplishing that can be a challenge with noisy distractions constantly around us.

That's where Cisco® Headsets come into play with a range of professional wired and wireless headsets that seamlessly extend the collaboration platform and fit any workstyle. They're optimized for use with Cisco devices, IP phones, and soft clients. Plus, they make management and service easier than ever.

Elevate your listening and communicating to a new level

With 500 and 700 Series headsets, you'll enjoy premium audio quality, powerful noise isolation, intuitive controls, exceptional comfort, and easy maintenance to keep you connected and immersed in a truly satisfying listening experience.

Cisco Headsets: Any environment. Any workstyle.

A complete portfolio of wired and wireless headsets that extend the collaboration experience to keep you connected.

Reliable audio performance allows you to hear and be heard, no matter how, when, or where you need to talk.

Deep integrations between Cisco hardware and software enables simple and intuitive user experiences.

A single platform for all your Cisco endpoints apps, and headsets for intelligent management.

Headsets that make your job feel less like work.

So, what can you expect when use a Cisco Headset? The short answer is superior audio, easy operation, and all-day comfort. Let's take a closer look at the many features and benefits you'll enjoy.

Pick the perfect model

The Cisco Headset portfolio includes a range of single-ear and dual-ear models, wired and wireless options, plus a variety of connection options so you can experience great sound no matter what your job requires.

Enjoy lasting comfort

The lightweight and ergonomic design of Cisco Headsets put comfort front and center. They reduce head fatigue, so you can wear them all day long. You may even forget you're wearing them. The headsets are built with quality materials including soft, multiaxial ear cups.

Hear crisp, clean audio

Our advanced ear cup design produces a full, rich sound that enhances your experience. The clear audio makes collaboration easier and music more enjoyable.

Experience a new level of voice quality

The microphones on Cisco Headsets deliver a premium audio experience. The 500 Series has a unique, unidirectional microphone design that captures wide bandwidth audio – with little signal noise and even less distortion – so it zeroes in on your voice and reduces background noise. The 700 Series features clear voice technology which is a voice honing, boom less microphone design coupled with adaptive noise cancellation, background noise suppression, and side tone enabling crystal clear audio. You can count on reliable audio with Cisco Headsets.

The 700 Series feature clear voice technology, including a voice-honing, boom-less microphone design coupled with adaptive noise cancellation, background noise suppression, and side tone enabling crystal-clear audio.

Cisco Headsets

Ergonomic design delivers lasting comfort.

Premium audio makes every conversation music to your ears.

Powerful noise isolation provides audio privacy in any workspace.

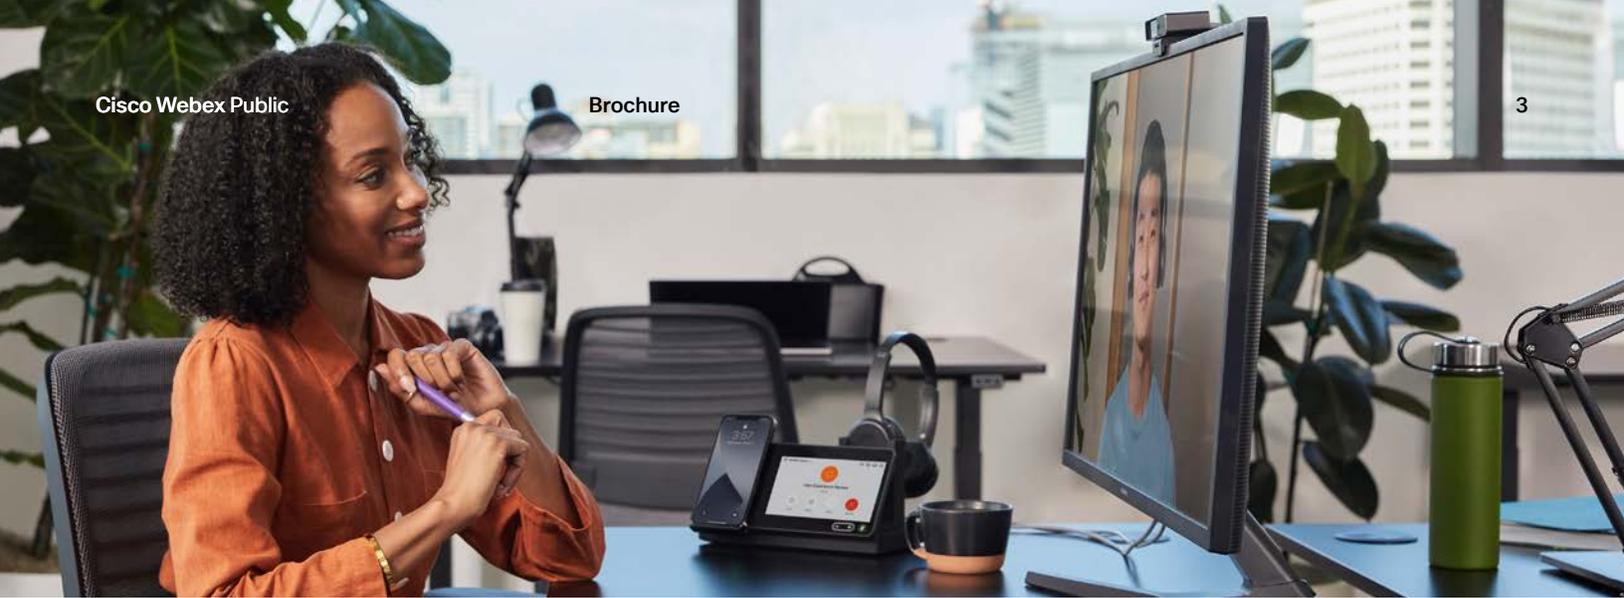

Intuitive user experiences.

Wireless communication allows you to work while on the move.

Flexible connection options let you work from any device.

Reliability so you can count on your headset to work.

Administration software simplifies mass deployment and management.

Fine-tune your microphone

The 500 Series features a microphone test that removes the guesswork associated with tuning gain levels. You simply record yourself speaking in your current work environment and then play the recording back to make sure your settings are optimal*. The 700 Series microphone automatically adjusts based on your environment for optimal performance.

Shape your sound

Cisco Headsets allow you to modify your audio to ensure an optimum listening experience whether you are on a call, listening to music, or watching a video*.

*500 Series feature requires a USB interface for headsets and a supported Cisco IP phone.

Enterprise-grade security

The 700 Series has industry-first, enterprise-grade security through hardware and software providing unparalleled Bluetooth® 5.0 security to help communications stay secure.

The Bluetooth® word mark and logos are registered trademarks owned by Bluetooth SIG, Inc. and any use of such marks by [licensee name] is under license.

Eliminate the hassle

Manage and troubleshoot all Cisco headsets from within your existing Cisco infrastructure. Headset management tools provide comprehensive inventory management, remote configuration and policy management, along with proactive diagnostics and quick troubleshooting.

Cisco Headsets: Any environment. Any workstyle.

When it comes to headsets, Cisco is a smart choice. We've long been a leader in collaboration technology, and we continue to create the most intelligent and intuitive collaboration experiences possible. Besides, there's so much to love about the Cisco Headsets. Crisp, clear audio is only the beginning. With our range of models, you'll find a headset that's perfect for your situation. You'll stay comfortable all day long and remain productive in any environment. You can work wherever you want, in one spot or on the move. You'll benefit from the peace of mind that comes with using reliable Cisco products. The best part, though, is that all adds up to a listening and conversing experience that makes your work far more enjoyable. So get all the details, then hear our headsets for yourself.
